To-Do List Web Application

Developed a To-Do application that allows users to manage tasks efficiently. The application features a RESTful API built with Node.js and Express.js and utilizes MongoDB for data storage

- User Authentication - Implemented user authentication and session management to provide secure, personalized task management.
- CRUD Functionality - Created RESTful API endpoints for tasks, enabling users to add, edit, delete, and mark tasks as completed.
- Data Persistence - Used MongoDB with Mongodb Driver for efficient data storage and retrieval, ensuring tasks are saved for each user.
